SolidWorks software for students is downloaded from a SolidWorks website. The software will work only with a WINDOWS operating system. You will need to register with SolidWorks as part of the process. Be sure to enter your OSU name.#@osu.edu when filling out the registration page, and to download the correct bit-version (32 bit or 64 bit) that is compatible with your Windows operating system. **BE SURE TO SELECT the 2014-2015 version during the registration process.**

Below is a 24-character code for you, and you only, to use for ONE installation of release 2014-2015 of SolidWorks to a personally-owned computer. The code will not work with previous, or later, versions. By software agreement, you may have only ONE INSTALLATION on your personal machine in support of your academic efforts while at OSU; so any previous version must be uninstalled. The software should then operate for 365 days after installation and activation, or September 30, 2015, whichever is earlier.

Research use is not allowed under current licensing. Also, the software must be removed from the computer of any student who graduates or otherwise leaves OSU. Users also must abide by the SolidWorks End-User-License-Agreement shown during installation.

SolidWorks “Student Engineering Kit (SEK)” software may be downloaded at:

Enter SEK-ID: XSEK12
Use serial number: 90200044208482278NQS8Q99

This license will expire after 365 days or 9/30/2015, whichever comes first.

**>>BE SURE TO SELECT the 2014-2015 version of SolidWorks when filling in the student access form (the serial number will work only for that version)<<**
